69 Subgroup Director's Message; The Michel Town Lists

71 The Postal Facilities of RPD Chemnitz; May, 1944
prepared by Don Slawson

I'm running low on material for future bulletins--except for writing's from Joe (must have 5 more or so on hand) and myself. So, if you want anything other than A.M.G. and Obliterations--write it up!! (Actually I do have a couple other items on the griddle).

A bit more on our new director: John is an Englishman by birth, employed by RCA. He's travelled extensively, putting communications systems in such places as Turkey, Nigeria, and the big tower out in San Francisco. In his travels he's often stopped off in Germany, and has met Dr. Dub, Heinz Sturm, and the other "big names". When I moved back here in '64 I had a small collection of "Locals". I met Al Heinz and John in 1965, and was impressed. Of course, it's impossible to tell exactly how much more intelligent a person is than you, but I could tell these two guys knew much more than I (and still do). While I have tended to try to learn the workings of the German postal system and have concentrated in narrow areas ("obliterations" and a bit of Allied Occupation) John has an excellent "broad-brush" knowledge of all postwar material (similar to Al). He knows at least a little bit about everything. And he's a better politician than I--basically I don't care about all the "philatelic garbage" in the "Locals" field, while the other two at least express an interest. He has been a "behind the scenes" spark-plug ever since the group was reactivated.

A.M.G. DISCUSSIONS

by: Joe Schirmer

A.M.G. Editor

In early June of this year, I traveled a total round trip by air of exactly 2000.9 miles--for what?? merely to visit with Don Slawson and then drive to New Jersey to see the Group Leader Al Heinz and attend an evening meeting about Germany issues. Though the meeting was but a short 5 hours, it was made most pleasurable by the attending of John Barbour, Ken Mears, and of course Heinz & Slawson and myself.

Believe me, I was shown some German materials I had only read about; the discussions gave me some good answers to many of my questions and theories; it left me with some new avenues of A.M.G. to explore and research. Ken Mears even surprised me with a few nice A.M.G. covers, and later before I left Don's home in Virginia, I managed to "chisel" him out of a few A.M.G. goodies.

Coupled with the good food and drink and lodgings given us by Al and his wife, I found this trip to be a philatelic success, and I got to meet some people that I had known only by mail and telephone over these years. And to answer your thoughts, Yes, I will be doing it again later this year (I hope) if the weather holds good up north.

The new Michel Specialized Catalog for Germany 1985 did really go through a major revision (see G.P.S. Postal Specialist, May 1985 pages 212 & 213).

I like what they have done with the A.M.G. section and it is now 11 full pages against the previous 4 pages. Once again the A.M.G. Booklet panes are listed and the Pol perfins for the A.M.G. are listed in a new format. The publishers have listed many of the important plate varieties previously not mentioned.

As the publisher stated; "every collector, every Study Group, every dealer and every collaborator had a different idea on how his area should be cataloged". But the publishers did achieve a very good uniformity of the catalog's contents and due to so many changes and additions, there were numerous price changes. I am pleased to note with the new Michel catalog, that the publishers did listen to one or two of my suggestions regarding A.M.G. as a whole and the booklet panes.

I am still gathering data on the label paper and trial proofs mentioned in a previous column--with some luck and your patience, it should be a reality hopefully by the end of the year. Research like this leaves little margin for error. Do any of you out there care to send along what data you have in this area??

Have you all noticed that Slawson put out a nice thick issue loaded with much good and interesting postal history (when he can get the data). But like myself, he needs more input from you members..why not let either of us know what you like and want--whether or not you have data to share. Either of us will write it for you if you feel you do not have the time or ability to do same....remember friends; "an organization is only as good as its members who contribute"--nuf said.

The cover illustrated was posted to the Russian Zone which helps make it a mite more difficult to obtain. So what you say?? The real reason I show you this cover is to growl about a pet peeve of mine for so many years...note the pencil notations under each stamp and also a repeat of the cancellation date. Why any intelligent collector would do this is beyond me. If you must make notes, then do it properly and use a small piece of paper that can usually be enclosed inside the envelope. The back of this cover not only had the dealer's name where the previous owner purchased it, but also a price code. Of course I have since then removed the pencil marking and fortunately there was no damage. And to press a point, I recently purchased a lot of mixed A.M.G. covers, and NOT ONE cover had any pencil notations whatsoever. Perhaps some of you can give me a logical reason as to why a collector will mark the face of a cover—I have seen dealers do this also but usually in the lower corners.

I finally have been hearing from some new A.M.G. collectors who are asking for help in different areas...this is good. The help is there but you must ask for it. Pooling our information will certainly make for a better Study Group.

Finally your Editor has once again resumed his membership #5 in the ARBEITSGEMEINSCHAFT-AM POST, our counter part in Germany. Their new editor will be working closely with Don Slawson and myself especially on A.M.G. matters.

Recently I tabulated some figures from membership lists of various philatelic organizations as to how many A.M.G. collectors and the results did surprise me a bit. While I cannot guarantee the accuracy of these figures (this is what I had to work with), I am wondering just how many of these collectors are actively collecting A.M.G. Take a look at these figures and perhaps you will get the drift of my thoughts:

Germany Philatelic Society	200	*
GPS Post WW2 Study Group	37	**
American Philatelic Society	63	
U.S. Possessions Philatelic Society	53	
Arbeitsgemeinschaft-AM Post	64	(only 5 US members)
TOTAL	417	

- * I would hope the GPS Secretary will verify this
- ** I have questioned our Secretary about this figure

One must remember that there is some cross-membership (as in my own case) so the true figure will not be known until I start to mail out questionnaires to all of you--and therein lies my motive for this research. Be patient; I am almost ready to have the questionnaires printed....your cooperation will be greatly appreciated and above all; I believe the results (if there are any) will not only surprise you, but perhaps help us all with our research and our collecting of A.M.G.

A.M.G. REPORT

by: Joe Schirmer

A.M.G. Editor

I once again looked through the well-known German philatelic magazine, and this time, I found exactly 2 ads that pertain to our specialty of A.M.G.--and this issue was 151 pages..does this tell us something about our collecting specialty?? The 1 ad was from a dealer offering 1000 A.M.G. mint stamps for DM 47.50--the other was from a private collector(?) offering some stamps for sale. I am waiting to hear as to what he has to offer.

While on the subject, I have noted a few A.M.G. covers in German auctions franked with German local issues. Their starting bids were well over 800 DM and it is easy to understand why. I would like to hear from any of you who has information on these issues franked on A.M.G. covers along with any zerox copies of same. Usual postage and printing costs will be given.

My thanks to a long time correspondent, Oskar Winter, the well-known German collector for answering a few of my questions in previous columns. Oskar gave me the best and most logical answer to why the "tack marks" appeared on the 3 pfg. American printing and also the 3 pfg. German printing. I'll discuss this in a later column. Thanks Oskar for your help.

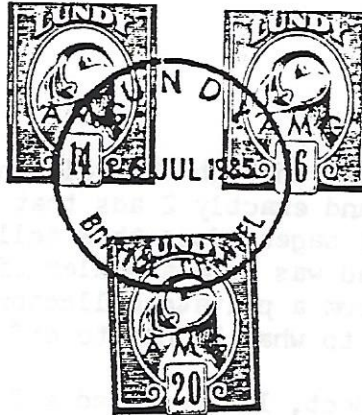

Winter also gave some more logic as to why there are slight but noticeable variations in the perforation between 10 & 12. This I will also discuss in another column. And both Slawson and Winter gave me a clear answer to the various letters, like "kk" or "x", etc. that appears in cancellers--it is merely a way the P.O. used to identify the clerk who did cancelling.

Our German counter-parts, ARBEITSGEMEINSCHAFT-AM Post are starting to come up with some interesting articles re AM-Post generally. I am working along with my translator (yes I can read some German) and eventually will have some of these articles in print for you. Slawson has an nice file of these back issues. I have them all except #1, 9, 13 & 25--anyone out there have these issues to loan me for copying?? Postage and printing costs will be given.

Watch for the Ram Stamp Co. auction sometime in October..they will be having some real good A.M.G. items for sale. Bob Molbert who runs Ram, sure has been a great help to me in building my collection to what it is today...reminds me, I got to get either a bigger safe or else a larger safe deposit box.

Another auction house who has very good A.M.G. materials but is weak in Germany (usually) is Bianco. His Italian and Trieste Zone "A" A.M.G. items are great, but expensive. And recently I even found a few good A.M.G. Cinderellas in an auction run by the U.S. Possessions Philatelic Society.

Speaking of A.M.G. Cinderella items, of which there are a few; note the latest to cross my desk recently:

These "rare" provisional issues of Lundy Island were on the back of a cover sent to me. The sender did whet my philatelic appetite, but as yet, as not given me any data on these issues. I do have my various "spies" working on this case, and have already determined this:

1. besides the 3 shown issues there is also a $\frac{1}{2}$ puffin which a dealer friend sent me a strip of 3
2. I not only suspect, but have it on reasonable authority that someone on the Island did a favor for various members of the Lundy Island Collectors Club, and had the issues overprinted.

But soon, I hope to have the complete story and will report same to you. Something like this, is what makes collecting our specialty so interesting...while we know Cinderellas in our field are uncomm, they do pop up from time to time---and tracking them down is what collecting ia all about. Anyone out there have any further light to share on this "mystery"---I wonder if Dulin is listening???

A thought has been developing in my mind---I wonder how many of you collect the other areas of A.M.G. philately..to eit: Austria; France; Italy; Korea and Trieste Zone "A". I did collect them all for years, but when I took a recent 2 year hiatus from collecting, I sold out. When I came back to collecting, I decided that specializing in Germany at this stage of my 'philatelic career' would be best best for my and the one area I could handle with good results. Needless to say, it was a good choice.

As part of a perforation study, I would like to know what type of gauge you use...name,type and manufacturer if possible.

If you want to learn about your specialty and improve your collection; then ask QUESTIONS..if you want to run with the tide; then just remain SILENT. I leave you to ponder this bit of philosophy that applies to all organizations.

Subgroup Director's Message

What do we collect? What is the significance of the Michel town lists? Have you ever wondered.....?

The Michel catalog contains a list of "Towns thus far reported which used Saxon obliterations" or something to that effect. Have you ever wondered "What is the significance of this list?". What does the list prove? Who would care what towns used the obliterations?

WHAT IS IT WE ARE REALLY TRYING TO COLLECT?

Are we trying to collect an example of an obliteration from each postal facility which applied obliterations? This is impossible to do!

In general you will never know who applied the obliteration to any particular stamp. As Michel now points out, the occurrence of an obliteration stamp on a postal consignment does not mean the stamp was obliterated by the postal facility which cancelled the stamp. The obliteration may have been applied by the facility which cancelled it, but it may have been a "private (non-postal) obliteration", or the stamp may have been purchased--already obliterated--at one postal facility but mailed and cancelled at another facility. It is also possible that the stamps held by a primary post office (Postamt) were obliterated prior to distributing them to their subordinate facilities (Zweigpostämter, Poststellen I, and/or Poststellen II) which requested additional stamp supplies; in this case you could have many facilities (post offices) selling obliterations actually applied at a different facility (and I think I could show this actually occurred if I had to). It is also possible that a consignment left the facility where the stamp was cancelled with an unobliterated stamp which was later obliterated somewhere prior to the consignment being delivered. Thus there are many ways whereby a cover can have an obliteration applied at a place other than where the cover was cancelled.

We will never know with 100% certainty which post offices applied obliterations and which did not.

If our goal is to collect an obliteration from each post office which accepted obliterations--and which had or may have had a stock of stamps on hand and therefore is most likely also the originator (applier) of obliterations--then MICHEL IS, in my opinion, MISSING A WHOLE CLASS OF FACILITIES WHICH SHOULD BE CONSIDERED!

In examining the Michel list for RPD/OPD Chemnitz (the only RPD which I have exhaustively studied) I find that all entries refer to post offices of rank Postamt, Zweigpostamt, Zweigpostamt (M), or Poststellen I--there are no Poststellen II (exception : "Reifland", which may be a "special" Poststellen II). It seems that Michel lists only those offices that possessed a date canceller (Tagesstempel). It is entirely possible, in fact it is likely, that the Poststellen II were sources of obliterations.

If my understanding of the German postal system is correct (and at this stage it is entirely possible my understanding is not correct) the Poststellen II normally had a small stock of stamps on hand for sale. Thus, I would assume that the end of the war and resumption of postal services on 12 May (if in fact services had ever really ceased) found many Poststellen II with small supplies of stamps which were obliterated before being sold to the public. A Poststelle II obliteration could also occur if a postal patron turned in a consignment with an unobliterated stamp to a Poststelle II and they obliterated it. It is also possible that the superior Postamt

(the Leitpostamt) sent the Poststelle II (through the Landpoststelle?) supplies of stamps which had not been obliterated, delegating the task of obliteration to the Poststelle II. I don't really consider this latter possibility too likely; probably the Landpoststelle of the superior Postamt sent out already obliterated stamps. But, sending out unobliterated stamps does remain a possibility.

Poststellen II are in sort of a "no-mans land" functionally. Stamps on consignments taken in through them are (except in special cases) cancelled by the superior (or supervisory) primary post office (Postamt) called in this case a Leitpostamt. Postal money transfers and checking account transfers (Postanweisungen and Zahlkarten) taken in through them are recorded and receive a Bezirkstempel at the superior primary post office. Thus, in many respects not really much happens at a Poststelle II, most of the action takes place at the superior primary post office. Probably for this reason Poststellen II are quite often not included on lists of postal facilities (the lists are often given as "postal facilities with date cancellers" or some such heading).

However, when considering "cork obliterations", it seems to me that a Poststelle II is as significant as any other class of postal facility. I think it is highly likely that many poststellen II were the source of obliterations (see my article "Poststelle II Schmalzgrube über Wolkenstein" in the June 1983 bulletin) and whatever criterion Michel uses to list postal facilities (be it offices which obliterated stamps, offices open to the public accepting mail, or whatever) that POSTSTELLEN II ARE OFFICES WORTHY OF RECOGNIZING IN THE SAME LIST AS THE OTHER POSTAL FACILITIES LISTED BY MICHEL.

- - TOWN SCARCITY - - WARNING - - - - -

I have seen some auction catalogs and price lists list obliterations from Michel unlisted towns with that fact mentioned and an Ausruf (starting bid) or price higher than would otherwise be warranted. In the words of that famous American Archie Bunker THIS IS CRAPOLA!!!

The concept of Michel unlisted towns being worth a premium is nonsensical in that if it were true then, as soon as the town was reported to and listed by Michel it would be worth less. This is obviously a logically indefensible position: the scarcity of material from a town is not dependent upon whether or not Michel lists the town.

At present all I can give is some of my general impressions concerning scarcity (because I have not done an exhaustive study, whose results would have to be reported town-by-town anyway). Some of my impressions agree with Michel's pricing and some don't. Michels breakdown by RPD only at best reflects a half-truth.

- * Big (high volume) offices are more common than smaller offices. Many large RPD Dresden offices are more common than small RPD Chemnitz offices.
- * RPD Dresden is scarcer than RPD's Chemnitz or Leipzig; Leipzig is not much scarcer than Chemnitz.
- * The part of RPD Chemnitz occupied by Americans until July 1st is at least as scarce as RPD Dresden.
- * The 50Pfg. value is pretty scarce--apparently because it was not an "even rate" (other stamps were required with a 50Pfg.). The 20,30,40,60,80Pfg., and 1RM all represented "even rates" for money transfers. The 50Pfg. is probably as scarce as the 1RM.

DES

The POSTAL FACILITIES of RPD CHEMNITZ, MAY, 1944

Following is a list of all postal facilities (offices of rank Postamt, Zweigpostamt, Zweigpostamt(M), Poststelle(I), and Poststelle(II), no Posthilfstellen (since they possessed no receiving stamp mail taken in through them cannot be identified)) in RPD Chemnitz taken from the May, 1944 Ortsverzeichnis I.

Following information given for each postal facility:

- 1. Name of facility (column 6: "Post Office Name")
- 2. Rank of facility (column 5: "Class")

- PA = Postamt
- ZDA = Zweigpostamt (K or L)
- Z(M)DA = Zweigpostamt(M)
- PSTI = Poststelle I
- PSTII = Poststelle II

- 3. Area (column 7: "Area")

- 1 = American occupation until 1 July, 1945
- 2 = American occupation until 14 June, 1945
- 3 = Soviet occupation entire time (includes unoccupied Kreis Schwarzenberg which used obliterations like Soviet area)
- 4 = possibly American occupied (I'm not certain of exact American area)
- 9 = Soviet occupied, controlling (supervisory) Postamt American occupied

- 4. Name of Supervisory Postamt (column 8: "Controlling PA")

- 5. Information on which offices are known to have been open

- Column 1: Michel listed
I did not check this, it is easy for you to check this if interested.

- Column 2: "seen"
These checked are towns I have actually seen cancels from, I've either seen actual pieces or Xerox copies.

- Column 3: "Reported"
A check here means town has been reported to me but I have not seen actual picture (usage less certain than a check in column 2, but I tried to note only good sources--I personally believe these).

- Column 4: "receiving cancel"
A check here means I have seen the cancel of this office as the receiving cancel on a postal money transfer, meaning the office was apparently open for business. This column not checked if column 2 was checked.
